Stores saw more people buying home appliances in mid-2020. Because of COVID-19, many people in the US had to stay at home from March to June. During these months, bread machines were the most popular in stores because people had much more time to start new hobbies.

At the beginning of 2020, COVID-19 made many people sick all over the world. This caused many public places to stay closed for months. People had to think of things to do at home. Studies show that watching movies and TV shows, cooking, and more indoor activities were more popular than the same time in 2019. That's why TVs, video games, and other home appliances were selling well earlier this year. Bread machines were doing the best of all. All you need is flour and butter, and then just push the button. In fewer than four hours, you can enjoy the freshest bread at home. People loved the idea because they could go to stores less often. Also, with one bread machine, you can make different kinds of bread. "It looks like the most useful thing to have at home at the time," one clerk said. Even on the Internet, there were more people looking up bread recipes than in the past.
