

The background is a deep blue gradient with a subtle pattern of white dots. Overlaid on this are several faint, light-colored circular graphics. These include concentric circles, some with dashed lines, and larger arcs with degree markings ranging from 140 to 260. Small arrows indicate a clockwise direction of movement for these circular elements.

If you give in to temptation and give a bored little mouse your iPhone, even for ten minutes, he's probably going to beam to some faraway place beyond time, space, and the sound of your pleading voice. And if he's that far gone, he won't have any idea what's going on around him, and he just might end up missing out on all the *real* fun.

From the *New York Times*–bestselling author of **Goodnight iPad** comes a delightful new commentary on the perils of our tech-obsessed lives and a fully charged romp for readers of all ages.

Every child has the right to play — but in some parts of the world, children spend more time working than playing. This thought-provoking book captures how different the world can look from the eyes of those less privileged.
