

01 Sharks

What has fins, sharp teeth, and swims in the ocean?

A shark!

Sharks have been around for a very long time. Sharks have lived in the oceans even before dinosaurs! Sharks are fish, and there are over 400 types of sharks. When they have babies, the babies are called pups.

Sharks lose their teeth, like humans, but they don't just lose their baby teeth. They lose teeth throughout their lives. When a shark loses a tooth, a tooth from another row of teeth will move into its place. New teeth are always growing.

Sharks might look scary, but they are not usually dangerous to people. People are more dangerous to sharks, since people hunt sharks. To be safe, it is a good idea to leave sharks alone if you see them!

2 Kitten's Choice

Kitten plays with her new toy. She loves her new toy. Her brother likes her new toy, too. When Kitten isn't playing with it, her brother takes it to play.

Kitten is having fun. Then, she sees a mouse! She wants to chase the mouse. If she chases the mouse, her brother will take her toy.

Kitten thinks. She can only choose one thing to play with. If she picks the mouse, her toy will go away with her brother. If she picks the toy, the mouse will run away. Which one should Kitten pick?

Kitten runs after the mouse. She does not see a lot of mice, so that is more fun. She does not catch the mouse, but she has fun running after him. Kitten is happy with her choice.
